

KAZI SADMAN ZAHIN

COMPUTER SCIENCE & ENGINEERING STUDENT

Phone: 01886677655 | Email: kazisadman897@gmail.com | GitHub: Kazi-Sadman | LinkedIn: sadman-zahin

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience in software development, backend systems, databases, and machine learning. Proficient in C++, Python, C#, React, FastAPI, Django, and SQL, with project experience in REST API development, relational database management, web applications, and system-based solutions. Seeking a Bank IT Internship to contribute to software development, IT operations, database management, system support, troubleshooting, and secure technology solutions while gaining practical experience in banking technology.

TECHNICAL SKILLS

- **Languages:** C++, Python, C#
- **Web & Backend:** JavaScript, React, FastAPI, Django, REST API
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server
- **Machine Learning:** NumPy, Pandas, Scikit-Learn
- **IT & Systems:** Computer Networking, Operating Systems, System Administration, IT Troubleshooting
- **Soft Skills:** Problem Solving, Teamwork, Communication

TECHNICAL PROJECTS

Student-Course Enrollment System (Full-Stack) | GitHub: Student_Enroll_Management_System

- Built a full-stack enrollment platform with a React front-end and a FastAPI back-end, following a layered architecture: Routes to Services to Models to Database.
- Modeled Student, Course, Department, and Enrollment entities with SQLAlchemy ORM and Pydantic-based request/response validation.
- Enforced enrollment business rules including duplicate-enrollment prevention and relationship-based lookups (courses by student, students by course).
- Developed and tested full CRUD REST APIs across all four modules using Postman.

SMS Spam Detection System | GitHub: sms_spam_classifier

- Engineered an SMS spam classifier in Python using NLP preprocessing (tokenization, stopword removal, stemming) and TF-IDF vectorization (3,000 features) on the SMS Spam Collection dataset (5,572 messages, cleaned to 5,169).
- Trained and compared 7 models – Multinomial/Bernoulli Naive Bayes, Logistic Regression, SVM, Random Forest, Voting and Stacking ensembles – selecting a Voting Classifier as the final model for its precision-performance balance.
- Deployed the model as a live Streamlit web app; co-authored an accompanying research paper (in preparation for conference submission).

Hostel Management System | GitHub: Hostel_Management_System

- Developed a desktop hostel management system in C# (Windows Forms, .NET Framework) with Microsoft SQL Server via ADO.NET.
- Designed Student, Room, Employee, and Payment modules with role-based access for Admin and Receptionist users.
- Created a dashboard tracking total students, room/bed availability, and payment status across 6 relational tables.

EXPERIENCE

Project Engineer (Academic Role) – Hospital Appointment Booking System | GitHub: HospitalAppointmentSystem

- Collaborated with 2 teammates to build a full-stack hospital appointment system (PHP, MySQL, JavaScript, AJAX) under a strict MVC architecture with shared database/authentication.
- Owned the Admin module: doctor and specialization management with live AJAX search, system-wide appointment oversight, and patient account management.
- Implemented secure authentication (bcrypt hashing, session-based RBAC) with dual-layer client/server validation.
- Applied prepared statements to prevent SQL injection across Admin, Doctor, and Patient modules.

PUBLICATIONS

Scaffold-Aware Drug Solubility Classification: Quantifying Generalization Gaps in Machine Learning Models with SMOTE and Extended Molecular Fingerprints on AqSolDB

- Status: Accepted for publication, BECITHCON 2026.

COMPETITIVE PROGRAMMING

- CodeChef – 2-Star, max rating 1403
- LeetCode – judge rating 1483
- Solved 700+ problems across Codeforces, CodeChef, LeetCode, LightOJ, and Toph
- Strong foundation in algorithms, data structures, and logical problem-solving built through consistent practice.

EDUCATION

B.Sc. in Computer Science & Engineering, American International University-Bangladesh (AIUB)

Dhaka, Bangladesh | Expected Graduation: 2027 | CGPA: 3.60 / 4.00
