

KAZI SADMAN ZAHIN

COMPUTER SCIENCE & ENGINEERING STUDENT

Dhaka, Bangladesh — kazisadman897@gmail.com — 01886677655 — GitHub — LinkedIn

OBJECTIVE

Computer Science and Engineering student with strong skills in programming, database management, networking, operating systems, and cybersecurity fundamentals. Experienced in developing software and database-driven applications using C++, Java, Python, C#, React, Flask, and SQL. Seeking a banking IT role to contribute to software development, IT operations, system support, and secure technology solutions.

PROFESSIONAL SKILLS

- Problem Solving & Analytical Thinking
- Communication & Teamwork
- Time Management
- Adaptability & Quick Learning
- Attention to Detail
- Critical Thinking

TECHNICAL SKILLS

- **Programming:** C++, Java, Python, C#, SQL
- **Database:** MySQL, PostgreSQL, Microsoft SQL Server
- **Web & Backend:** HTML, CSS, JavaScript, React, Flask, FastAPI, REST API
- **IT & Systems:** Networking, Operating Systems, Sys. Admin, IT Troubleshooting

PROJECTS

Student-Course Enrollment System — Backend

- Developed a RESTful backend using Python, FastAPI, SQLAlchemy, and SQLite/PostgreSQL for managing students, courses, departments, and enrollments.
- Implemented a layered architecture (Routes → Services → Models → Database) to separate API handling, business logic, and database operations.
- Implemented validation and business rules including student/course verification and duplicate enrollment prevention.
- Developed relationship-based APIs to retrieve courses by student and students by course.

SMS Spam Detection System

- Developed a machine learning-based SMS classification system using Python, NLP, TF-IDF, and Scikit-learn to classify messages as spam or legitimate.
- Compared multiple machine learning algorithms and ensemble methods using accuracy, precision, F1-score, and confusion matrix.
- Deployed the final model as an interactive Streamlit web application.

Hostel Management System

- Developed a desktop-based hostel management application using C#, Windows Forms, ADO.NET, and Microsoft SQL Server.
- Implemented modules for student, room, employee, and payment management with separate Admin and Receptionist access levels.
- Implemented authentication, role-based access, database operations, search, and dashboard-based system monitoring.

EXPERIENCE

Project Engineer (Academic Role)

[Project Date]

- Collaborated with 3 team members to develop a full-stack hospital appointment management system using PHP, MySQL, JavaScript, AJAX, and MVC.
- Developed the Admin Module for managing doctors, specializations, patients, and appointments.
- Implemented authentication, Role-Based Access Control (RBAC), data validation, and secure database operations.
- Worked on module integration and database connectivity to ensure smooth system functionality.

PUBLICATIONS

Scaffold-Aware Drug Solubility Classification: Quantifying Generalization Gaps in Machine Learning Models with SMOTE and Extended Molecular Fingerprints on AqSolDB

- Accepted for publication, BECITHCON 2026.

COMPETITIVE PROGRAMMING

- CodeChef — 2-Star, max rating 1403
- LeetCode — judge rating 1483
- Solved 700+ problems across Codeforces, CodeChef, LeetCode, LightOJ, and Toph
- Strong foundation in algorithms, data structures, and logical problem-solving built through consistent practice.

EDUCATION

B.Sc. in Computer Science & Engineering — AIUB

2023 – 2027

- American International University-Bangladesh (AIUB), Dhaka, Bangladesh
- CGPA: 3.60 / 4.00
